Database design

Cloud Basics (AWS or Azure, Cloud

Profile

Software Engineer trained at the Don Bosco University of Lubumbashi (UDBL), combining technical expertise in software engineering with solid practical experience in network infrastructures. With an immersion in a mining environment (IT/OT department) and specialized training in telecommunications, I master network diagnostics, equipment management, and the development of reliable solutions. Results-oriented, I wish to put my versatility at the service of the management, optimization, and securing of operational systems (OT).

Education

**Bachelor's Degree in Application Design
and Development (Software Engineering)**

2021 – 2025

Don Bosco University of Lubumbashi (UDBL), Lubumbashi

**Secondary Studies (Commercial &
Management)**

2015 – 2021

C.S Les Barons 2

Employment

Software Developer

Sep 2025 – Present

Inverse Numérique et Technologique, Lubumbashi

- Development and maintenance of technological applications and software solutions.
- Collaboration with the technical team to optimize system performance and resolve bugs.
- Implemented automated data validation and error handling routines to improve system reliability.
- Designed, coded, and tested scalable software components for production systems to enhance data processing efficiency.
- Developed and maintained data processing applications to streamline production workflows.
- Conducted unit and integration testing to ensure software reliability and performance.

Networks and Telecoms Intern

Apr 2025 – Jun 2025

INPP (National Institute of Professional Preparation)

- Configuration, management, and maintenance of network equipment (Switches, Routers).
- Use of Cisco Packet Tracer for architecture simulation and Wireshark

networks)

Data Cybersecurity (Data protection and backup)

Data Analysis

OSI Model (7 layers)

IP Addressing (IPv4/IPv6)

DNS

Gateways

Switch and Router Management

Advanced network troubleshooting

Frame analysis with Wireshark

Simulation with Cisco Packet Tracer

User management, access rights

Operating systems administration (Linux/Ubuntu, macOS, Windows)

Software architecture

Algorithmics and complex problem solving

React

Tailwind CSS

JavaScript (HTML5, CSS3)

Accessibility standards (WCAG 2.1)

Version control (Git/GitHub)

Continuous integration concepts (CI/CD)

Unit testing

Figma

Adobe XD

for in-depth packet and traffic analysis.

- Management of addressing (IPv4/IPv6), configuration of gateways, and DNS services.
- Monitored network traffic and security protocols to identify and mitigate potential threats.
- Conducted performance testing of network infrastructure to optimize data transmission speeds.

IT/OT Intern (Information Technology / Operational Technology)

Oct 2024 - Dec 2024

MMG (Minerals and Metals Group)

- Immersion in IT/OT operations in an industrial and mining environment.
- Administration of user management, access rights, and basic security policies.
- Network troubleshooting and first-level technical support on operational systems.

IT Consultant & Software Engineer (Freelance)

2022

Lubumbashi

- Successfully executed multiple independent projects, managing end-to-end client requirements and diversified environments.
- Responsible for the full lifecycle of web applications, including architecture, server deployment, and connectivity management.
- Proactive analysis and correction of complex technical incidents, ensuring high availability of services.

Technical Project Manager (End of Studies Project)

2024 - 2025

UDBL

- Development of "DotUI", an eco-designed UI component infrastructure, with implementation of stability tests (Vitest).
- Configuration and troubleshooting of heterogeneous environments (Dual-boot Ubuntu/macOS on Intel architecture).

Courses

Preparation for the concepts of Cisco CCNA and CompTIA Network+ certifications

2026

- Studied fundamental networking concepts including OSI and TCP/IP models essential for CCNA and Network+ certifications.

Languages

French

English

Swahili

- Gained knowledge in managing IP addressing schemes, including IPv4 and IPv6 protocols.
- Practiced using network simulation tools like Cisco Packet Tracer for designing and testing network topologies.
